

## **ANNEX VII: Basis for the preparation of financial statements**

### **A. Principle**

1. Financial statements as defined in Articles 47 and 48 must be based on the accounting standards required by local legislation for incorporated companies – either the applicable financial reporting framework of the relevant country, the International Financial Reporting Standards or the International Financial Reporting Standard for Small and Medium-sized Entities – regardless of the legal structure of the licence applicant.
2. Financial statements must be prepared on the assumption that the licence applicant is a going concern, meaning it will continue in operation for the foreseeable future. It is assumed that the licence applicant has neither the intention nor the necessity to go into liquidation, cease trading or seek protection from creditors pursuant to laws or regulations.
3. The financial reporting framework, suitable as a basis for the preparation of financial statements, must contain certain underlying principles including:
  - a) fair presentation;
  - b) consistency of presentation;
  - c) accrual basis for accounting;
  - d) separate presentation of each material class of items;
  - e) no offsetting of assets and liabilities or income and expenses.
4. The financial statements must be approved by management and this must be evidenced by way of a brief statement and signature on behalf of the executive body of the reporting entity.

### **B. Consolidation/combination requirements**

1. The financial information of all entities included in the reporting perimeter (as defined in Article 46bis) must be either consolidated or combined as if they were a single company.
2. Consolidated financial statements are the financial statements of a group in which the assets, liabilities, equity, income, expenses and cash flows of the parent and its subsidiaries are presented as those of a single company.
3. Combined financial statements are those that include information about two or more commonly controlled entities without information about the controlling entity.

### **C. Accounting requirements for player registrations**

1. Notwithstanding that each licence applicant has to prepare audited annual financial statements under its own national accounting practice for incorporated companies, the International Financial Reporting Standards or the International Financial Reporting Standard for Small and Medium-sized Entities, these regulations include a specific accounting requirement for player registrations carried as intangible fixed assets as set out in Articles 47, 48 and 52.
2. Licence applicants that capitalise the costs of acquiring a player's registration must apply certain minimum accounting requirements as described in paragraph 4 of this part C.
3. If a licence applicant has an accounting policy to expense the costs of acquiring a player's registration rather than capitalise them, and this is permitted under their national accounting practice, there is no requirement for such entities to apply the minimum accounting requirements set out below and they do not have to prepare restated figures.
4. The minimum accounting requirements for licence applicants that capitalise the costs of acquiring a player's registration are as follows:
  - a) In respect of each individual player's registration, the depreciable amount must be allocated on a systematic basis over its useful life. This is achieved by the systematic allocation of the cost of the asset as an expense over the period of the player's contract.
  - b) Only direct costs of acquiring a player's registration can be capitalised. For accounting purposes, the carrying value of an individual player must not be revalued upwards, even though management may believe market value is higher than carrying value. In addition, whilst it is acknowledged that a licence applicant may be able to generate some value from the use and/or transfer of locally trained players, for accounting purposes costs relating to an applicant's own youth sector must not be included in the balance sheet – as only the cost of players purchased is to be capitalised.
  - c) Amortisation must begin when the player's registration is acquired. Amortisation ceases when the asset is classified as held for sale or when the asset is derecognised (i.e. the registration is transferred to another club), whichever comes first.
  - d) All capitalised player values must be reviewed individually each year by management for impairment. If the recoverable amount for an individual player is lower than the carrying amount on the balance sheet, the carrying amount must be adjusted to the recoverable amount and the adjustment charged to the profit and loss account as an impairment cost. It is recommended that each licensor requires each of its licence applicants to apply consistent accounting policies in respect of player registration costs.

- e) The profit/(loss) on the disposal of a player's registration to another club to be recognised in the profit and loss account is the difference between the disposal proceeds and the residual carrying value of the player's registration in the balance sheet as at the date of the transfer.
5. The licence applicant must prepare supplementary information (to be submitted to the licensor) if the accounting requirements described in this annex are not met by the disclosures and accounting treatment in the audited annual financial statements. The supplementary information must include a restated balance sheet, profit and loss account and any associated notes to meet the requirements set out above. There must also be included a note (or notes) reconciling the results and financial position shown in the supplementary information document to those shown in the audited financial statements (that were prepared under the national accounting practice). The restated financial information must be assessed by the auditor by way of agreed-upon procedures.
